Re:

WTKS(AM), Savannah, Georgia Facility Identification Number: 8589 Capstar TX Limited Partnership Special Temporary Authorization

Dear Mr. Langham:

This is in reference to the request filed November 4, 2010, on behalf of Capstar TX Limited Partnership (Capstar). Capstar requests further extension of the special temporary authority (STA) granted on March 7, 2007, to operate Station WTKS during nighttime hours with an emergency nondirectional antenna and reduced power. In support of the request, Capstar provides a report of its progress toward restoration of licensed operation. Capstar states that it has filed an application to correct the site coordinates and has made a decision to upgrade the phasing and coupling equipment and to convert the station's license to a Method of Moments proof.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is

¹ WTKS is licensed for operation on 1290 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WTKS may continue to operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation during nighttime hours with a temporary nondirectional antenna and reduced power not to exceed 1.25 kilowatts also is authorized, only as necessary to facilitate the repair work. It will be necessary to further reduce power or cease operation if complaints of interference are received. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on May 23, 2011.

Sincerely,

Charles N. Miller, Engineer
